University of Minnesota Press, United States, 2015. Paperback. Book Condition: New. 201 x 124 mm. Language: English . Brand New Book. The Intellective Space explores the nature and limits of thought. It celebrates the poetic virtues of language and the creative imperfections of our animal minds while pleading for a renewal of the humanities that is grounded in a study of the sciences. According to Laurent Dubreuil, we humans both say more than we think and think more than we say. Dubreuil's particular interest is the intellective space, a space where thought and knowledge are performed and shared. For Dubreuil, the term cognition refers to the minimal level of our mental operations. But he suggests that for humans there is an excess of cognition due to our extensive processing necessary for verbal language, brain dynamics, and social contexts. In articulating the intellective, Dubreuil includes the productive undoing of cognition. Dubreuil grants that cognitive operations take place and that protocols of experimental psychology, new techniques of neuroimaging, and mathematical or computerized models provide access to a certain understanding of thought. But he argues that there is something in thinking that bypasses cognitive structures. Seeking to theorize with the sciences, the book's first section develops the intellective hypothesis and points toward the potential journey of ideas going beyond cognition, after and before computation. The second part, Animal Meditations, pursues some of the consequences of this hypothesis with regard to the disparaged but enduring project of metaphysics, with its emphasis on categories such as reality, humanness, and the soul.
