

The Soil Will Save Us: How Scientists, Farmers, and Foodies Are Healing the Soil to Save the Planet (Hardback)

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

THE SOIL WILL SAVE US: HOW SCIENTISTS, FARMERS, AND FOODIES ARE HEALING THE SOIL TO SAVE THE PLANET (HARDBACK)

RODALE PRESS, United States, 2014. Hardback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book. Thousands of years of poor farming and ranching practices and, especially, modern industrial agriculture have led to the loss of up to 80 percent of carbon from the world s soils. That carbon is now floating in the atmosphere, and even if we stopped using fossil fuels today, it would continue warming the planet. In *The Soil Will Save Us*, journalist and bestselling author Kristin Ohlson makes an elegantly argued, passionate case for our great green hope a way in which we can not only heal the land but also turn atmospheric carbon into beneficial soil carbon and potentially reverse global warming. As the granddaughter of farmers and the daughter of avid gardeners, Ohlson has long had an appreciation for the soil. A chance conversation with a local chef led her to the crossroads of science, farming, food, and environmentalism and the discovery of the only significant way to remove carbon dioxide from the air an ecological approach that tends not only to plants and animals but also to the vast population of underground microorganisms that fix carbon in the soil. Ohlson introduces the visionaries scientists, farmers, ranchers, and landscapers who are figuring out in the lab and on the ground how to build healthy soil, which solves myriad problems: drought, erosion, air and water pollution, and food quality, as well as climate change. Her discoveries and vivid storytelling will revolutionize the way we think about our food, our landscapes, our plants, and our relationship to Earth.
